Comedy concept album where each track takes place in a restaurant. Full of entertaining dialogue that'll have you hearing something new each time you listen. If you like sketch comedy similar to vintage SNL SCTV, you'll love this. 12 MP3 Songs SPOKEN WORD: Comedy Details: Humorist Michael T. Scott writes and performs thousands, hundreds, OK, dozens of characters in Pre-Chewed Appetizers, a project that brings sketch comedy back to beautiful Technicolor-audio. Each track takes place in Magellan's, an upscale restaurant where celebrities, superheroes, rednecks, monkeys, and even Jesus can be found! It's the dining experience complete with eavesdropping but minus the free bread. Although an attempt was made to include rolls and spreadable butter with the CD, the complication of putting expiration dates on each package just wasn't worth the effort. Portions of the proceeds from every sale are donated to the charity RAINN: The Rape, Abuse and Incest National Network. For more information on this charity, go to [rainn.org](http://rainn.org).
