

Mp3 Tomas Nicholas - Time, Lapsed

[DOWNLOAD HERE](#)

Junglesque ambience to rock/techno upbeat with the Worldwide DRUMMING Fad tune included. 14 MP3 Songs NEW AGE: Environmental, NEW AGE: Ambient Details:

***** PLEASE NOTE: The songs in this album are the same as in the nolder version of this cd entitled, "Autumn Dancing" by tom tanzi, also on CD Baby and the internet. Both Offer downloads of these same tunes..., only the ARTWORK and order of tunes is different. I like this cover because I offer large , signed prinys of the artwork at the "circleblue.net" page.

***** I created the first Artists Co-Op online. Does anyone remember "Nobody In Particular"? Many people sent cassettes to me..., wow. This is how it evolved, all this online stuff...,I think it is all amazing if not deluded, oh well, it's fun to check out YOUR samples. Just another guy from a musical family who knew many years ago that ALL this cyber-media thingy would be available so, I had a product ready, one from the heart of me. I think it is for those who are in the Autumn (leaving Summer) of life and need something totally different. It's completely original and performed on a Roland D-20 keyboard (all the many drums, too) every bit is played on the keyboard with the clean-up from a (late) friend's studio in Southern Oregon. I think I captured what I had hoped to by enhancing this ad lib material. I just had to lay this down and get it out cuz I got it from my mom who got it from her mom.

***** I grew up in a dark redwood forest producing many moods and came out on the edge of the San Francisco Bay Area and the place was rock'n. Went to a 'Dead Concert' in Kezar Stadium in the Park and the next week climbed the mountain above the forest, was standing in the wind and heard musical chords blowin' by..., It was Led Zeppelin in the that Park...,30 miles away as the crow flies. Been turned on to sound and experimenting ever since! The other thing is how waves go inside us, thru around, reflect or absorbed,kinda kewl, eh?

***** Next CD is "cover tunes". I like other peoples' compositions and a good song is a GOOD song! Any genre or age, no matter how old I am/I mean how old it gets. Sure do hope to compose again some day! ***** Check out the ***** "Environmental Drums Of Earth", it is originally from my first album, MUSIC THINGY. "Go Gentle...", gets techno...., the first song is kinda dancin cheek-to-cheek. Oh, check 'em all out. All cultures might enjoy this as well as all ages. I love all sorts of creative expression, but this is not mainstream. Ya kinda, gotta have GOOD Bass on yer system! Please pass on the environmental thingy..., no air, no music
