"Discover How YOU Can Profit From Your Mailing List With Every Way Possible - From The Moment Your Subscriber Visits Your Lead Capture Page Until He Receives E-mails From You! " Finally... YOU Can Now Create Your Own Personal Mailing List Fan Club And Make Money From It With Every E-zine Issue And E-mail Message You Send Out To Your Subscribers Are you currently facing any of the following scenarios? (Please check the boxes as you read.) I don't have a mailing list. I know nuts about having my own mailing list let alone how to set one up! I already have a mailing list but somehow it's not making me any decent money. I must have done something wrong in the process but I have no idea where the mistake was. I am tired of guessing and beginning to wonder how other Top Internet Marketers make a living solely from their own mailing list. The size of my mailing list is no bigger than a peanut. I want to multiply the size of my subscriber list BIG time! If you have checked one or more of the boxes above, then this is certainly one of the MOST important letters you will ever read. I understand your frustrations. I faced the same challenges you are facing now when I first started my Internet Business, but I had no one to turn to, and had to learn everything for myself. A lot of my precious time was wasted on guessing, shooting in the dark, spending a lot of unnecessary money, and worse still, making myself broke. After years of discovering what works and what does not, I now have a mailing list I can confidently call my own money making machine. But I learned how to build my profitable mailing list - the hard way. Whoever said that building your own mailing list is going to be an easy task! But then, having your own

mailing list is one of the most important assets you **MUST, MUST** (and really **MUST**) have in your Internet Business because... Your Mailing List = Your Asset = Your Money Machine If you have been in touch with the Internet Business and Marketing world for some time, I am sure that you have heard of the overused saying "the money is in the list" being quoted by many Internet Marketers. Of course, that is often true only if you harness your mailing list well enough that your subscribers are responsive and that they **DO** read your emails every time you send a broadcast to your mailing list. But if you are to have an Internet Business, you must have your own mailing list. No other exceptions. If you don't own a mailing list, that could only mean that you don't own a business in the first place. Before anything else, it is important for you to have good reasons to have your own responsive mailing list (and not just any kind of mailing list) in the first place. Consider the following: If you join a Network Marketing company, your upline would require you to write a list of 100 names of people whom you know. The people you know are your prospects because they might be interested in becoming a consumer or starting their own Network Marketing business like you. If you own a Conventional B2B Business, your target prospects are other businesses, and their information and contact details are likely to be found in the Yellow Pages or telephone directories. Thus the information found in Yellow Pages and the telephone directories are your list of prospects. If you play and sell Magic: The Gathering collectible cards, your list of prospects consists of those who play the same card game, too. Would a Pokemon player be interested in buying your Magic: The Gathering game cards? Only if he is a Magic: The Gathering player, too! So, why have your own mailing list? Because that is where your potential customers are! Now That We Have Established That Having Your Own Mailing List Is Mandatory... You are still faced with some or all of the following challenges to profiting from your mailing list: How to get targeted subscribers into your mailing list with minimum effort, and maximum results. How to develop trust and relationships between you and your subscribers. How to get your subscribers to give you a chance by opening your E-mails. How to get your subscribers to buy from you instead of from other people they are subscribed to. How to create a mailing list system that works without any guesswork and little testing on your part. How to understand your subscribers' needs and interest so you know what product or service to endorse to them! With so many challenges standing between you and profiting from your mailing list, you must think it is a wonder how Top Internet Entrepreneurs make their money by the truckloads from their mailing list, even though in some cases, their mailing lists are not as huge as you thought they were.
