Entheogen punk - a catalyst for progressive minds 9 MP3 Songs ROCK: Punk, ROCK: Psychedelic
Details: Musical Mission. We seek to open our audience's minds through the powerful mediums of progressive music and art. We make music for ourselves and the few individuals who dare to think for themselves. This is our sound, our genre. Although we dislike classifying music because we feel that doing so slows the evolutionary process of music, we call our sound "Entheogen Punk", a term spawned by Albert Hoffman, the chemist who discovered LSD. We are angular, noisy, experimental, rockabilly, hard-edged psychedelic, surf math rock that is dynamic enough to keep our rabid and rapidly-increasing fan-base coming back for more. We are unlike anything you have ever encountered, but everything you love in intense and vibrant art. We have a hell of a live show. So take a chance on us, and you will not be disappointed. Push the envelope. Believe in nothing...
