

Mp3 Justin Connor - Behind The Sun

[DOWNLOAD HERE](#)

Rare factory-sealed, original-artwork copies of Justin's hard-to-find debut EP. 5 MP3 Songs ROCK: Modern Rock, ROCK: Classic Rock Details: LIMITED AVAILABILITY!! Written and recorded in Los Angeles in early 2002, Justin's debut EP, 'Behind the Sun', got shelved before it ever got the chance to receive the vast attention it deserved, due to his recent full-length debut release, 'Kaliyuga'. 'Behind the Sun' has been heavily traded, burned, and downloaded for the last few years -- and now a limited amount of copies are available in its original form, with the original artwork, and photos -- all in mint condition, but unfortunately, in extremely limited supply. Many of the songs were later re-recorded, re-mixed, and served as the impetus for Justin's full-length debut release, entitled 'Kaliyuga'. 'Behind the Sun' garnered critical acclaim by fans and critics alike, with Justin putting his own stamp on defining an original, idiosyncratic lo-fi aesthetic with style to spare. "Imagine a voice between a young Lou Reed and Roger Waters crossed with Coldplay... fans of The Verve should check this out too because these 5 songs could very well have been written by Richard Ashcroft. The track Angelyne just needs a video on MTV to promote it with and the success would be in the same division as the one Coldplay are enjoying right now. Behind the Sun feels like sitting on the rocks by the sea on a cloudy day in November, looking out on the raging waters and just being totally lost in the magic of the stormy ocean - Pink Floyd couldnt have done it better - hypnotic and seductive, yet so beautiful...." - melodic.net For more music, news, and tour information please visit justinconnor.com. To purchase "Kaliyuga" go to cdbaby.com/cd/justinconnor2.
