Atmospheric, uplifting and sometimes haunting collection of electronic records. 14 MP3 Songs

ELECTRONIC: Experimental, ELECTRONIC: Down Tempo Details: Electro is an album covering a range of electronic music styles and influences. The records on this album move from quirky and atmospheric electro and ambient to house and trance styles. I use very few samples in my work. I like to write it all myself from scratch. I have always been a big fan of early electronic music pioneers. Inspirations that have undoubtedly found their way into it and blended with my own ideas and writing style. 2 records from this album 'Ghostcraft and Dark Science' were picked from hundreds of demos for release on the Computer Music magazine cover cd by Tim Oliver. He has produced many top bands including 'The Stone Roses'. Please read the track descriptions below for info on the records. 1 record (Ghostcraft) from this album is available for free at my website. Also many other tracks from this album can be heard in full and in much better quality by visiting [isound.com/music/mattsolo](http://isound.com/music/mattsolo) This link is also featured from my website. For those of you out there that like your music a bit more trancy please take a moment to view my second album 'Energize' This album is a non stop melodic trance/dance fest!! Thanks Mattsolo. - - - - -
