This is a collection of ambient soundscapes designed to bring one's psyche into a place of de-stressing, relaxation, and timelessness. Synthesized sounds are mixed with fine-tuned natural sounds to create an outside-the-flow sense of being. 9 MP3 Songs in this album (78:07) ! Related styles: NEW AGE: Relaxation, ELECTRONIC: Ambient People who are interested in Steve Roach Robert Rich Liquid Mind should consider this download. Details: These are hand-picked tracks by SourceCodeX from earlier releases with one new track created especially for this release. I compiled these tracks for a lecture I gave on relaxing and de-stressing via ambient music. A story on my music hit the local papers and I decided to offer this type of "best of" release that represented the deeper-listening moments from my releases 2004-2008. Many attendees of the lecture purchased this compilation at the meeting and later feedback confirmed that this CD's music indeed transports the listener into a place of timelessness and relaxation. Each CD comes with notes on how to best use this CD to find "that place" all your own, outside and beyond the tyranny of the urgent. Enjoy!
