

Mathematical Models Of Convection

[DOWNLOAD HERE](#)

1;Preface;5 2;List of contributing authors;11 3;1 Equations of fluid motion;17 3.1;1.1 Basic hypotheses of continuum;17 3.2;1.2 Two methods for the continuum description. Translation formula;20 3.3;1.3 Integral conservation laws. Equations of continuous motion;23 3.4;1.4 Thermodynamics aspects;29 3.5;1.5 Classical models of liquids and gases;32 4;2 Conditions on the interface between fluids and on solid walls;40 4.1;2.1 Notion of the interface;40 4.2;2.2 Kinematic condition;41 4.3;2.3 Dynamic condition;42 4.4;2.4 Elements of thermodynamics of the interface;47 4.5;2.5 Conditions of continuity;49 4.6;2.6 Energy transfer across the interface;50 4.7;2.7 Free surfaces;55 4.8;2.8 Additional conditions;57 5;3 Models of convection of an isothermally incompressible fluid;60 5.1;3.1 Isothermally incompressible fluid;60 5.2;3.2 Equations of thermal convection of an isothermally incompressible fluid;62 5.3;3.3 Model of linear thermal expansion;63 5.4;3.4 Some submodels;65 5.5;3.5 On boundary conditions;67 5.6;3.6 Two problems of convection;69 6;4 Hierarchy of convection models in closed volumes;76 6.1;4.1 Initial relations;76 6.2;4.2 Similarity criteria;78 6.3;4.3 Transition to dimensional variables;80 6.4;4.4 Expansion in the small parameter;83 6.5;4.5 Equations of microconvection of an isothermally incompressible fluid;87 6.6;4.6 Oberbeck-Boussinesq equations;90 6.7;4.7 Linear model of the transitional process;91 6.8;4.8 Some conclusions;94 6.9;4.9 Convection of nonisothermal liquids and gases under microgravity conditions;97 6.10;4.10 Convection of a thermally inhomogeneous weakly compressible fluid;104 6.11;4.11 Exact solutions in an infinite band;109 6.12;4.12 Analysis of well-posedness of the initial-boundary problem for equations of convection of a weakly compressible fluid;121 7;5 Invariant submodels of microconvection equations;131 7.1;5.1 Basic model and its group properties;131 7.2;5.2 Optimal subsystems of the subalgebras T_1 and T_2 , factor-systems, and some solutions;134 7.3;5.3 On one steady solution of microconvection equations in a vertical layer;142 7.4;5.4 Solvability of a nonstandard boundary-value problem;153 7.5;5.5 Unsteady solution of microconvection equations in an infinite band;160 7.6;5.6 Invariant solutions of microconvection equations that describe the motion with an interface;166 8;6 Group properties of equations of thermodiffusion motion;173 8.1;6.1 Lie group of thermodiffusion equations;173 8.2;6.2 Group properties of two-dimensional equations;190 8.3;6.3 Invariant submodels and exact

solutions of thermodiffusion equations;198 9;7 Stability of equilibrium states in the Oberbeck-Boussinesq model;214 9.1;7.1 Convective instability of a horizontal layer with oscillations of temperature on the free boundary;214 9.2;7.2 Instability of a liquid layers with an interface;224 9.3;7.3 Convection in a rotating fluid layer under microgravity conditions;233 10;8 Small perturbations and stability of plane layers in the microconvection model;243 10.1;8.1 Equations of small perturbations;243 10.2;8.2 Stability of the equilibrium state of a plane layer with solid walls;247 10.3;8.3 Emergence of microconvection in a plane layer with a free boundary;257 10.4;8.4 Stability of a steady flow in a vertical layer;268 11;9 Numerical simulation of convective flows under microgravity conditions;279 11.1;9.1 Numerical methods used for calculations;279 11.2;9.2 Numerical study of unsteady microconvection in canonical domains with solid boundaries;290 11.3;9.3 Numerical study of steady microconvection in domains with free boundaries;307 11.4;9.4 Study of convection induced by volume expansion;323 11.5;9.5 Convection in miscible fluids;343 12;10 Convective flows in tubes and layers;363 12.1;10.1 Group-theoretical nature of the Birikh solution and its generalizations;363 12.2;10.2 An axial convective flow in a rotating tube with a longitudinal temperature gradient;371 12.3;10 EAN/ISBN : 9783110258592 Publisher(s): De Gruyter Format: ePub/PDF Author(s): Andreev, Victor K. - Gaponenko, Yuri A. - Goncharova, Olga N. - Pukhnachev, Vladislav V.
