ROCK: Modern Rock, ROCK: Emo Details: Jim Robert, a talented musical artist even early on, began learning guitar, piano, bass, audio engineering, and how to sing one at a time starting when he was 16 years old. He has his childhood piano lessons, and his experience playing the trumpet at school, to kick start his music career, and soon began working to finance his growing assortment of music equipment. After building a recording studio and mastering the art of being both a Producer and an Engineer in the studio, he produced his debut album, "All the Cool Kids," and gathered up a few of his peers to begin a 3 month tour to get his infectious music out to as many people as he could. 'All the Cool Kids' touches on the intimate intricacies of teen love, the desperate last cries of an inmate on death row, the excessively sexual nature of Pop Culture, and the cliché personalities of the high school drama scene.
