Blends classic new wave / new romantic sounds with modern synthpop and industrial. 16 MP3 Songs

POP: New Wave, ROCK: Goth Details: Swedish act Moulin Noir has been a flag-waver for the new wave / new romantic sounds initially created by the likes of John Foxx, Ultravox, Visage, and Gary Numan. This newest album takes Moulin Noir's music to a whole new level, blending those lush roots together with a modern edge, creating an album that crosses many tastes and electronic pop boundaries, from new wave, to synthpop, to darkwave, to gothic. It took Moulin Noir almost two years longer than initially anticipated to put together this album, because as the production progressed, the standards were set higher and higher, until a wonderful collection of 16 tracks were perfected.
