

# Dynamic Semantics

[DOWNLOAD HERE](#)

The integrated theory of dynamic interpretation set out here will be a surprise to advanced researchers in linguistics. It combines classical formal semantics and modern dynamic semantics without altering the fundamental paradigm. At the books core lies a pragmatically motivated notion of a dynamic conjunction of meanings, an idea that is worked out in full formal detail. This is applied to linguistic phenomena that involve anaphora, quantification and modality. The author demonstrates that in each area of application existing data can be neatly combined with new dynamic insights, but more importantly, there is a genuine further pay-off: the work generates treatments of phenomena that were not initially intended, with functional readings of pronouns and quantifiers, Hob-Nob sentences, and insights into what we now call Pierces Puzzle. The outcome of a decade of work by the Amsterdam School of dynamic semantics, this volume condenses and reflects upon a vital body of research. EAN/ISBN : 9789400748699 Publisher(s): Springer, Berlin, Springer Netherlands Format: ePub/PDF Author(s): Dekker, Paul J.E.
