This is a completely new textbook written to be fully in line with the new BTEC Higher National unit from Edexcel, the 2000 specification Advanced GNVQ unit, BTEC NII and NIII, and A-Level modules. The resulting breadth of coverage makes Microelectronics - Systems and Devices an excellent international student text. The book takes a student-centred approach towards microelectronics, with Test Your Knowledge features to check understanding, and numerous Activities suitable for practicals, homeworks and other assignments. Key facts, formulae and definitions are highlighted to aid revision, and theory is backed up by numerous examples throughout the book. Each chapter ends with a set of problems, which include exam-style questions and multiple-choice questions, with numerical and multi-choice answers provided in the back of the book. In addition, a number of Assignments appear through the book for which answers are provided in a separate lecturer's supplement (free to adopters). The Assignments are ideal for tests or revision homeworks. As well as matching the latest syllabuses, this book covers the latest devices in use in colleges: the 80C31 and PIC families. The material is suitably flexible to provide a core text for colleges using other chips such as the 8051, the 8086/Pentium family and 'classics' such as the Z80 and 6502. Owen Bishop's talent for introducing the world of electronics has long been a proven fact with his Beginner's Guide to Electronics, Understand Electronics and a range of popular circuit construction guides chosen by thousands of students, lecturers and electronics enthusiasts. He is also well known for his college texts such as Understand Technical Mathematics. Author: Bishop, Owen
