A horn of plenty containing catchy, goofy and creative pop songs that will make you chew your cheek and rock the mic. 31 MP3 Songs POP: Quirky, POP: Beatles-pop Details: Alex Arrowsmith wanted to be an astronaut because he was attracted to the idea of playing with space dogs and monkeys. He also really wanted to get some bears and cougars into space after many years of not having bears and cougars in space, and he thought what better way to do this than by working from the inside? As it happened, NASA rejected his application based solely on the fact that he has never seen Chariots of Fire. Until the day comes that Alex can finally lay eyes on that rare elusive movie, he must spend his days making up songs about bears and torpedoes. On this gargantuan pop extravaganza, Alex explores the power of myth in "Yeti Or Steve," "Respect The Bear" and "Wolverine Trapped In A Safe Deposit Box" while he tackles the sensitive political issues of facial hair on "Beard Down To Here," "Beard So Soon," "My Dudes Are Your Dudes" and "Haffa Stache." While these songs may sound like incredibly sophisticated artistic statements, they really are just crazy pop songs for me, you and Alex to sing and love. Mostly Alex though.
