Intricately arranged electro-pop with jazz and hip-hop leanings. 12 MP3 Songs ELECTRONIC: IDM, POP: with Electronic Production Show all album songs: The Drake Songs Details: Patrick Lee is exceedingly tall and handsome and has been the latter since birth. He is a vegetarian. He studied jazz piano at the University of Colorado at Boulder and enjoys cooking Italian food in his kitchen. As well as writing, recording, and producing over a dozen albums himself, Lee also founded the seminal Colorado funk bands the Analog Quartet and Doctor X, and is currently one-half of the up-and-coming indie project Beauty Flash. And when hes not conquering the electro-hip hop-dance scene, Lee still finds time for solo and ensemble work in the Denver jazz scene. While classically trained, it's easy to see the influences of jazz, hip-hop, and indie rock in Lee's works. Over the span of his lengthy discography we hear samples of instructional videos, soul singers, classic jazz horns, and popular cartoons from our childhood - all the while, his infectious beats and clever playing mold a soundtrack for the world around us. Patrick Lee is a very nice guy, but he probably bets on sports more than your whole family combined.
