

Theory Of Heat Transfer With Forced Convection Film Flows

[DOWNLOAD HERE](#)

Introduction.- Basic conservation equations for laminar forced convection.- Falkner-Skan type transformation for laminar forced convection.- New similarity analysis and transformation method for laminar forced convection.- Heat transfer on laminar forced convection without consideration of viscous thermal dissipation.- Heat transfer on laminar forced convection with consideration of viscous thermal dissipation.- Heat transfer on laminar forced convection with consideration of variable thermophysical properties.- Complete similarity mathematical models on laminar forced film condensation of pure vapor.- Velocity and temperature fields on laminar forced film condensation of pure vapor.- Heat and mass transfer on laminar forced film condensation of pure vapor.- Complete similarity mathematical models on laminar forced film condensation of vapor-gas mixture.- Velocity and temperature fields on laminar forced film condensation of vapor-gas mixture.- Heat and mass transfer on laminar forced film condensation of vapor-gas mixture EAN/ISBN : 9783642125812 Publisher(s): Springer, Berlin Discussed keywords: Konvektion, Wrmeleitung, Wrmebertragung Format: ePub/PDF Author(s): Shang, Deyi
