Date: Monday, April 7, 2008 From: Ameer Salim & Mohd. Najib Subject: Internet Marketing Basics Videos

Dear Friend, Do you know that when you're starting out on an Internet business, you will come across A LOT of new challenges that are RARELY being told by most people? Step-by-step guides are a good way to start and that really cut down on your learning curves. However, Most marketing manuals teach you WHAT to do instead of showing you "How To Do" I have heard the same questions over and over again from many newbies on how to setup their online business. Things like... How do I register a domain name? What the heck is 'DNS' and how do I change them? How do I register a web hosting account and get my site set up? How do I install popups on my website? How can I let customers automatically download my product? How do I set up an autoresponder? How do I process my orders? How do I setup my order links? How can I upload files to my webpage? You simply cannot setup a business on the Internet without knowing these and other basics steps. So, I decided that I was going to put together a series of online videos to help newbies cut their learning curve drastically and eventually get their own Internet business up and running a whole lot faster and easier. After *literally* months of hard work, I finally manage to create a series of video tutorials successfully
