60's style California Sunshine Pop with a tasty Psychedelic edge. 11 MP3 Songs POP: 60's Pop, POP: California Pop Details: "sUite Slice of poP Pie" is my latest album and is available for your listening and purchasing pleasure here at CD BABY! My sound is a boiled down synthesis of hundreds of 60's Sunshine pop, Folk rock and Psychedelic bands I've loved over the years. The songs on this album range in emotion from jubilant Beach Boys style pop to moody, misty ballads to the guitar driven, mind bending, psychedelic! I wrote, recorded, produced and performed all the music on this album. I must give credit however, to my long time soul brother and fellow musical freak Sean Hutton for his insight, input, and "phone ears". He also co-produced "Maybe Some Other Day". Please take some time and listen to a few songs from the album here at CD Baby. I hope you enjoy the ride! Bill Rogers
