and who love to love constantly and can't get enough. "I Remember...",explains what true love is really all

about;it is love that is not built around material things but is built around a human being. In this song, the

man loves the woman without pretense and he will give up everything that he has just to have her come

home. "The Drama",deals with a person who does not know what he has until it is too late and he loses it to someone else,his best friend who happens to be his alter ego. However,he does not feel that it is too late and he will do anything to get her back including fighting to the death, that is lyrically speaking."Houston is taking on all the parts in this song, he is the alter ego and himself",the most asked question to him,"How are you going to perform this part live?" "Old School",are for those people who like to dance,party and have a good time.The dance track and the lyrics will take you back to the old school days.As Houston said,"The way his mother used to do it." You will experience "The Bump" again,"The Bus Stop" again,etc.,it will also bring you up to the latest dance,"The Electric Slide." "No More",reaches a point in one's relationship in which you have topped your boiling point to the level of no return,you have had enough and you would just like to end the relationship with no strings attached.The final end to it all will be claiming all of your possessions. Lastly,"Remember The Troops", Houston,dedicates this one to the Troops,then and now. The song is very touching and emotional,it has a bit of a twist, it is from the viewpoint of The Troop's. He says to his love ones in the States,"The Love is strong and not to worry...I will be alright,I will come home."
