A folk based sound that is transformed by funkified rhythm and soulful southern electric guitar. 10 MP3 Songs FOLK: Modern Folk, ROCK: Folk Rock Details: With the release of Alta Products, Maskil has landed with a unique sound that captures the heart of folk while solidly surrounding thoughtful lyrics with groove oriented instrumentation. It is a sound that captivates the listener and prompts them into asking questions about the content of the songs in relation to their own life. The acoustic driven sound is complimented beautifully by the southern soulful electric playing of Dan Olson and the solid funk style rhythm section of Ben and Andrew Borley. This is not just another band singing about love or disappointment, this is music that speaks out of a journey. Alta Products is the compilation of three years of work, and speaks at the heart of the human expression. It is well crafted and recorded with the passion of adversity and friendship all exploding onto the digital surface of the CD. Alta Products will most likely be a disk enjoyed by many. The expression of life in a faith experience adds depth and satisfaction to the stories so creatively displayed by the band, and gives the listener the opportunity to engage with the music on an entirely different plane.
