If you like PRINCE, you should enjoy this musical mix of funky R&B, acoustic funk, reggae, slow jams, and a touch of blues, electronica and rock. 15 MP3 Songs URBAN/R&B: R&B Pop Crossover, POP: Today's Top 40 Details: The Fellas is the brainchild of singer/songwriter Reginald J. Solomon; it is a conceptual band, at least as far as musical composition and studio recording are concerned. Reggie writes the material, sings and performs on all of The Fellas albums. Prince is a major inspiration, and is an excellent example of the one-man-band. Completely self taught, Reggie sings and plays a variety of different instruments, and doesn't read a note of music!!! Speaking of the music, it can be best described as eclectic, ranging from R&B to folk, with some rock and world beat thrown in the mix. Musical influences range from Prince to Bob Dylan and everything in between! As a member of his local arts association The Contemporary Arts Exchange, Reggie often performs live with his friends as "The Fellas" during open gallery shows on First Fridays. First Friday is a local tradition when artists open their studios to the public, and musicians hit the streets. Reggie's actual profession is in the field of psychology. He attended Emory University and works as a licensed psychotherapist specializing in Anger Management. His goal is to pursue a doctorate in counseling psychology and teach musical therapy in private practice.
