Introducing WP Affiliate Link Engine; the most feature-packed affiliate link cloaker available. Easily create, geotarget, manage and restrict affiliate links. Guaranteed Wipe referrer removal, company- and country-specific link destinations and more. WP Link Engine is the single best solution for cloaking your affiliate links. Link Engine allows you to cloak and mask your links, geotarget your link destinations, restrict who can access (by company/IP or referrer), split test different link destinations and automatically replace keywords within WordPress blogs. Features Save money by managing geo-destinations properly. Most affiliate networks direct traffic which is outside of the offer's "accepted countries" to generic offers which convert poorly and profit even worse. Create links which redirect less desirable traffic anywhere. Save time and make money turning existing blogs in to revenue generating machines: automatically replace relevant keywords within your posts to affiliate links. Gain better results by split-testing your affiliate offers. Divide your traffic up any way you like, among as many offers as you like. Control / hide links from affiliate networks and advertisers giving you a competitive advantage. Match based on referring

address, IP address or hostname to accurately control what each user sees when they click on your links. Furthermore, use Guaranteed Wipe to ensure that no referrer information is ever sent to the receiving website(s).
