1. Fulleranes and Carbon Nanostructures in the Interstellar Medium (Susana Iglesias Groth, Franco Cataldo).- 2. Infrared and Ultraviolet Spectra of Fulleranes: Hreels Studies and Implications for the Interstellar Medium (Carlo Carraro, Roya Maboudian, Conrad Stoldt).- 3. The Potential Role Played by Fullerene-Like Structures of Interstellar Carbon Dust in the Formation of Molecular Hydrogen in Space (Franco Cataldo, Susana Iglesias-Groth).- 4. Thermodynamic Properties of Fullrene Hydrides $C_{60}H_{2n}$ and Equilibria of Their Reactions (Gennady J. Kabo, Larisa Karpushenkava, Yauheni Paulechka).- 5. Fulleranes by Direct Reaction with Hydrogen Gas at Elevated Conditions (Alexandr Talyzin).- 6. Chemical Methods to Prepare [60]Fulleranes (Jonathan B. Briggs and Glen P. Miller).- 7. Synthesis Stability and Spectroscopy of Perdeuterofulleranes: $C_{60}H_{36}$ and $C_{70}H_{38}$. Evidences of Isotope Effects (Franco Cataldo, Susana Iglesias-Groth, Arturo Manchado).- 8. Isotope Effect in the UV Photolysis of Hydrogenated and Perdeuterated Fulleranes (Franco Cataldo, Susana Iglesias-Groth, Arturo Manchado).- 9. Characterization of Fulleranes by NMR Spectroscopy (Dan Johnels, Thomas Wgberg and Mattias Hedenstrm).- 10. Low Temperature Spectroscopy of C_{60} and C_{70} Fullerenes and Fullerane $C_{60}H_{18}$ (Franco Cataldo, Susana Iglesias-Groth, Arturo Manchado).- 11. High-Pressure Hydrogenated Carbon Nanostructures (A.V. Bazhenov, I.O. Bashkin, K.P. Meletov).- 12. Topological Modeling of Hydrogenated Fullerenes (Ottorino Ori, Franco Cataldo, Susana Iglesias-Groth, Ante Graovac).
