OUR SOUND: A trippy, mind altering experience, we suggest you buckle your safety belts, and brace yourself for a sonic experience never before realised. Imagine a pulsing baseline transcending your harshest memories of your harshest realities into a soothing sublime state where liquid guitar fills and ethereal piano chords take you elsewhere but still remind you of the pain from whence you came. Imagine a funky beat boppin' under somber lyrics crying out in pain, careful not to burn, but ever so eager to move you to reflection. Imagine a funky groove that has you milking every inch of a sweat soaked dance floor while all the coolies at the bar bop their heads to the funky beat permeating the very core of their souls.
