We seek to warp and fuse various styles of music - jazz, rock, Indian music, classical, funk - into something that inspires through deep grooves and improvisation. 8 MP3 Songs JAZZ: World Fusion, JAZZ: Weird Jazz Details: Based in New Brunswick, New Jersey, the Steve Hudson Quintet or SHQ was created to be a vehicle for experimenting with different musical ideas. We wanted to create an ego-free environment where we could try out different concepts and see what worked. If it the music meant something to us, then it would reach someone else....somewhere. The music on "Outer Bridge" is a gumbo soup of different influences. The music has an overall vibe to it that perhaps has something to with Indian music, in that there is a certain timelessness about it. The images that come to mind are "flying over water on a dark moonlit night"-wide open spaces where nothing is rushed, peace and calm coexist with interjections, and yet many times a killer groove kicks in. If jazz is "the sound of surprise," then this is it! -All About Jazz Cited as a Top Ten Album for 2004 by WPRB (Princeton University Radio), DJ Emanuel Ferritis
