

## Mp3 Wayne Glaser - How Long Is The Road

[DOWNLOAD HERE](#)

Many of the tracks were written about or influenced by The Adirondacks and would best be described as a cross between Jimmy Buffet and Gordon Lightfoot, music with a folk rock feel. 14 MP3 Songs EASY LISTENING: Soft Rock, FOLK: Folk Pop Details: Thanks for stopping by, I have spent the past two years writing, and recording the material on the cd. Several of the tracks were written about or influenced by The Adirondacks. There is a special guest performance by Greg Dillon who I would like to thank for his funky Reggae rhythm guitar on "Down in The Tropics" the rest of the music on the cd and vocals I did myself. Excerpts from an article in the Messenger Post newspaper Wayne Glaser has several of his songs featured on "Adirondack Trails, Inside the Blue Line, " a new show on the CW Network. The show covers the nature and various activities that occur throughout the four seasons in the Adirondacks. Glaser's songs are used in segments throughout the show and as the closing theme. Glaser, who started playing the drums and guitar when he was 14, was presented with the opportunity to write songs for the show after he sent out an e-mail about an Adirondack Web site he created to several people and was contacted by the folks that film and host the show. "It's something I always wanted to do, " said Glaser of the opportunity. "I have lots of ideas. " Some of the songs come from Glaser's new CD, "How Long is The Road. " Other songs were written specifically for the show to capture the essence of a particular episode's theme. "Part of it is getting your music out and letting people enjoy it, " said Glaser. "Music is just another extension of who I am. " I hope that you enjoy what you hear. Currently I am writing new music for an all Adirondack cd that will be titled "Adirondack Heart Soul". As the cd progresses you will be able to listen to and purchase tracks before they are released on the cd by visiting my Website link on the leftside of this page.
