This software need to be installed by a programmer, on a LAMP server. The software is based on CodeIgniter Framework. The software is multi language and will provide "simplified chinese" language support, also for pdf print of invoice. There are 3 kinds of auction: unique low bid, time increase and express. The "unique low bid" is the classic kind of auction. Time increase is similar to the first, but the time limit of the auction increase for every offer. In the Express Auction the user will pay to see the price of the object, and every time one user does that, the price decrease. The backend have all the function you need to control the auction: - define credits and cash conversion - define auction type - create object - create auction - upload image - possibility to reset auction and Refund bids. - auction closed public statistics - invoice The user have a registration form and an independent control panel, with the history of bids, auction, and credits. Payment method is set to work with paypal, but could be modified by a programmer to work with any kind of payment gateway.
