Search Engine Primer "Finally, A Step-By-Step System To Getting Top Rankings On The Search Engines" search engine primer Hello, If you have a website, or are planning on getting one, you'll quickly figure out that search engines will either be a good friend or your worst enemy! If you can get your site listed well (meaning your site comes up on the first page or so for popular keywords) you can expect to get a lot of visitors to your site. What's more important is that they will be targeted, and highly motivated to read what you have to offer! If your site can't be found on the first page or two of the results for decent keywords, your site will start to feel like a virtual ghost town! What you should do instead is follow the rules and learn from others that have managed to figure out how to get top rankings for their own websites. I'm one of those people, and I've put together the following guide so you can do the same: search engine primer One more thing that I hope you will get really excited about is that you get FREE reprint rights to the ebook as well!! What this means is that you are free to give a copy to your friends, newsletter subcribers, website visitors ... anyone you want to! Good luck, and I wish you the best of success! doman
