Filomath offers a passionate brand of upbeat rock- but with a twist, complementing the standard band setup is the analog synth sounds of a keytar played by LeRoy, the band's lead singer. In each of the hundreds of shows they've played throughout the Northeast and Mid-Atlantic regions, the group is comfortable at high schools, clubs, colleges, and festivals. Formed in 2000, the group quickly built a reputation and loyal following in New York City's underground music scene. They quickly caught the attention of recording industry veterans who paved the way for their self-titled album, produced and mixed by hit makers John Fields and Tom Lord Algae. The band has a lot to look forward to as the material on its album has already received adds at radio and their song, "Place in the Sun" introduced the Film of the Year at the 2004 MTV Film and Television Awards Show. For all of their talent, growing success, and hard work, the band's live show and recording reflect the fact that these guys have a sense of humor and don't take themselves too seriously.
