

Systems Biological Approaches In Infectious Diseases

[DOWNLOAD HERE](#)

1;Foreword;8 2;Systems biology and its impact on anti- infective drug development;11 2.1;1 Introduction;12 2.2;2 Data for systems biology: Omics, images and chemistry;14 2.3;3 Makingmodels;16 2.4;4 Networks;18 2.5;5 Integrative systems biology;23 2.6;6 New targets for anti-infective drug development;24 2.7;References;26 3;Applications of transcriptional profiling in antibiotics discovery and development;30 3.1;1 Introduction;31 3.2;2 Transcriptional profiling highly parallel measurement of gene expression;32 3.3;3 Comparison of the capabilities of transcriptomics and proteomics;35 3.4;4 The importance of experimental design and integrated data analysis systems;35 3.5;5 Discovering therapeutic targets;37 3.6;6 Forward pharmacology;40 3.7;7 Developing reporter assays for pathway-specific compound screens;43 3.8;8 Improving the compound selection and optimization process;45 3.9;9 Assessing drug safety and toxicology;47 3.10;10 Conclusion;48 3.11;References;50 4;Chemical genetics: An evolving toolbox for target identification and lead optimization;56 4.1;1 Genomic approaches to identifying drug targets;57 4.2;2 The genomic interface of chemistry and biology: Chemical genetics;58 4.3;3 Conclusion: Chemical genetics and drug development;78 4.4;References;78 5;Proteomic profiling of cellular stresses in *Bacillus subtilis* reveals cellular networks and assists in elucidating antibiotic mechanisms of action;84 5.1;1 Introduction;85 5.2;2 The tools of proteomic profiling;87 5.3;3 Proteomic contributions to understanding bacterial physiology;91 5.4;4 Proteomics in antibacterial drug discovery;95 5.5;References;102 6;Elucidating the mode- of- action of compounds from metabolite profiling studies;106 6.1;1 Introduction;107 6.2;2 Microbial metabolite profiling;108 6.3;3 Novel drug discovery;121 6.4;4 In vivo metabolic fluxes;122 6.5;5 Metabolites in systems biology;124 6.6;References;126 7;A subsystems-based approach to the identification of drug targets in bacterial pathogens;132 7.1;1 Introduction;133 7.2;2 Stage I: Choosing target subsystems. Genome- scale essentiality and conservation analysis;136 7.3;3 Stage II: Analyzing target subsystems. Metabolic reconstruction and functional predictions;146 7.4;4 Stage III: Selecting target genes. Target prioritization and validation;158 7.5;5 Concluding remarks: From targets to drugs;162 7.6;References;164 8;Metabolic control analysis to identify optimal drug targets;171 8.1;1 Introduction;172 8.2;2 Mathematical models: Assistants for the

human brain;173 8.3;3 Metabolic control analysis: Basic principles;175 8.4;4 Effective drug target identification using MCA;179 8.5;5 Enhancing anti-parasite drug selectivity with differential control analysis;180 8.6;6 Control of tumor cell growth;183 8.7;References;185 9;The protein network as a tool for finding novel drug targets;189 9.1;1 Protein linkages;190 9.2;2 Biochemical methods to identify protein-protein interactions;190 9.3;3 Computational methods to identify protein linkages;192 9.4;4 Protein networks;195 9.5;5 Drug targets;203 9.6;6 Conclusion;207 9.7;References;208 10;Toxicogenomics applied to predictive and exploratory toxicology for the safety assessment of new chemical entities: a long road with deep potholes;213 10.1;1 Overview;214 10.2;2 Toxicogenomics;216 10.3;3 Conclusion;229 10.4;References;230 11;Biological robustness in complex host- pathogen systems;234 11.1;1 Robustness is a fundamental organizational principle of biological systems;235 11.2;2 Four underlying general mechanisms for robustness;237 11.3;3 Intrinsic features of robust systems: Evolvability and trade- offs;239 11.4;4 Robustness attributes of pathogens;241 11.5;5 Limits of a robust system: Pathogen-triggered diseases;244 11.6;6 Does microbial flora affect vulnerability against pathogenic infections?;248 11.7;7 Future directions;250 11.8;References;251 12;Toward whole cell modeling and simulation: Co EAN/ISBN : 9783764375676 Publisher(s): Springer, Berlin, Birkhuser Discussed keywords: Infektion / Infektionskrankheiten, Pharmakologie Format: ePub/PDF Author(s): Boshoff, Helena I. - Barry, Clifton E.
