Clueless When It Comes To List Building? Worry No More, Because You Are About To Discover... "How You - Or Anyone For That Matter - Can Quickly And Easily Build A Mailing List And Get 1,000 To 3,000 Subscribers For FREE!" Finally, Here Is A Quick And Easy Way For You To Build Your Mailing List By Leaps And Bounds Without Spending Another Dime On Getting Another Precious Subscriber... And The BEST Part Is That Any Smart Or Schmuck Can Do Just That! Dear Clueless Mailing List Owner, It is every mailing list owner's wish to continuously build their mailing list consistently in pursuit of making money online. It makes sense, anyway, since the practice of publishing for profits dates way back into the early days of conventional businesses and the Industrial Age. The advantage we have today in the Information Age, though, is that we are able to publish our own E-zine (or newsletter) "paperlessly" without incurring high publishing costs and well... save plenty of trees in the process. With every savvy marketer often quoting that "the money is in the list", it becomes all too clear as the money-making success formula for every E-zine publisher and mailing list owner can be summed up as: Subscriber = Prospect = Potential Customer And the more responsive subscribers you have, the more money you can make with every offer you send to your mailing list. "If It Is So Easy, Why Is It So Hard?" Yes, you read that right. If it the success formula is so simple, then why are many mailing list owners struggling to make money from their list? Now, I thought you should know something really interesting: the problem most E-zine publishers and mailing list owners are having have little or nothing to do with starting their online E-zine publication. But rather, the major problem lies in list building. And this is often true with most clueless mailing list owners. It's granted that any Tom, Dick and Harry can easily start his own E-zine

publication. And like I've said earlier -- we can all publish our own paperless E-zines without incurring high costs and cutting several trees. But not everyone can build their own mailing list easily and effectively. And the result? Some clueless E-zine publishers lost a small fortune to ineffective advertising in pursuit of building their list while others are afraid of risking the little money they have, causing the size of their mailing list to remain meager. Are you one of them? Sure, you can resort to marketing methods such as article writing and Traffic Exchange, but how many subscribers can these methods fetch you? Not many, in the long run, compared to what I am about to tell you later. Alternatively, you can buy subscribers from list brokers but if you are on a twine-breaking budget, this option may not be for you, either. Okay, I won't go on venturing into solutions that seem less possible to you and your needs for that matter. But we've established that you want to build your mailing list intensively, right? Right?? And perhaps deep within, the challenge you want to pose to yourself - or anyone for that matter - is: Challenge: How To Get 1,000 to 3,000 Subscribers For FREE In 7 to 21 Days How do YOU - or any "somebody" or "nobody" - get 1,000 to 3,000 subscribers without spending a single cent on buying them over in the space of 7 to 21 days, even if you have a small or next-to-nothing mailing list? It might seem like Mission Impossible to a budding E-zine publisher, but I have a line of good news queued up for you: A lot of E-zine publishers have already accomplished this. It doesn't take a rocket scientist to be able to pull such a feat. In fact, you don't need to be well-versed with programming! And YOU can do it, too! Having said that...
