

## Mp3 Chigger - Trampoline

[DOWNLOAD HERE](#)

Edgy, schizophrenic indie pop with graceful and heartfelt vocals and adventurous instrumental passages. 5 MP3 Songs POP: Quirky, POP: 90's Pop Details: Odd Indie guitar pop with glockenspiel, squeeze box, violin thrown into an otherwise familiar guitar, bass, drums line up. Italia's voice and J.P. Cobb's guitar create some interesting tension. Italia's voice has a little Alanis meets Jewel influence but like the rest of the band, she also has her own unique style shining through. They say they have no idea of how to explain themselves. Others have used the words dreamy, poppy, schizophrenic and intense to describe their music. They do know though, that no matter what they say about their music, people are going to come to their own conclusions about what they sound like and who they are. The band came out of a conceptual idea more than it did out of boredom. All of the band members grew up in different parts of the country, but shared a similar love for music. Back in 1998, the members decided that it was time to start putting the songs together and get this band rolling. Chigger wanted to write songs that were honest, interesting, fun and a little different. They've always tried to hold fast to these ideals. It doesn't matter if it's the graceful and heartfelt "I Said I Said I Said" or the rockin "Sliding West" or better still, the sing along pop of "Noni", we know you are going to love this record. File under: Twisted Pop Steve plays bass, the squeeze box and sings Raised in Southern California Turn Ons: Brownies Turn Offs: Burnt brownies brownies with no milk Phil plays guitar, sings, plays the keyboard and likes to use a slide Raised in the heart land Turn Ons: Roller skating Turn Offs: Dairy and Steve's relentless brownie babble Italia sings her little heart out, plays the glockenspiel and percussion Raised in sin city Turn Ons: Bottled water Turn Offs: Tap water, hair extensions and filth John Nyboer plays drums on the cd
