Darkwave, Electro-Goth, Dark EBM 8 MP3 Songs ELECTRONIC: Industrial, ROCK: Goth Details: After a few years of shaping and molding its own structure and destination, Cylab has formed in the end of 1999 in Seattle founded by Percy Trayanov - keyboards, programming, vocals. Based on dark electronic foundation, the material varies style, breaking structural boundaries, incorporating different vibes and moods. Having a solid musical background, classically trained pianist and further exploring bass, throughout the years Percy had worked with numerous projects, involved in remixing and producing various artists, also having significant exposure on national and international level. Joining the venture is close friend SeVerina X Sol - vocals. It all started as more of an experiment, but almost immediately the sultry voice became a perfect fit to complete and refine the melt of chaos and balanced harmonic biorhythms. She also comes from seasoned musical background and being a founding member of Diva Destruction along with Debra Fogarty, where she records the band's first album "Passion's price" and part of the electro outfit Fockewolf.
