

50 Quickfire Tactics - Shortcuts To Online Business Success

[DOWNLOAD HERE](#)

Transform Your Business Fortunes Overnight With 50 No Cost, Hassle Free Shortcuts To Online Business Success (Some people call them cheap, some people call them cheats, but to be honest, when you save over \$40,000 and seven years of experimenting we don't really mind what they're called) Dear Online Marketer, There comes a time in every online marketers life, when things just go *click*, and everything falls into place, and let me tell you, from my seven years experience, it happens very, very quickly. Mostly when you're not expecting it. Frustrations Delays Late Nights Disappointments Gone. All gone. Just like that. How on earth do you reach that stage though? Well, before I show you that, I just want to point out a few things. The magic moment has some drawbacks, nothing is ever that easy as every one of us knows. All the usual stuff people don't want to hear. To get there it takes time, and it takes money. Two things that personally, I'd rather keep than spend on mindless guesswork (which is what most marketers are doing right now). The thing about this 'moment' though, is that there isn't just one of them. In fact, there's several, and they all appear one after the other. For some it takes a month, for some a year, and for some I know, it's been seven years and they're still trying. One of them messages me on MSN a few weeks back and says (and I quote exactly here) "Sigh, my new site failed again. Barely any visits. I spent loads setting it up too. Any advice for an old buddy?". I told "I have about

fifty little pieces of advice and suggestions, but I'd have to write you a book about it" followed by a little smiley sticking its tongue out. "Alright". That I wasn't expecting Ah I needed a new project anyway. So off I go, I went ahead and wrote it. When I finished it, I needed a test. He was the perfect subject (he agreed to this, I didn't test on him without his knowledge), and from what he told me it went down rather well. I'd love to repeat what he said here while feeling the excited high of his first major sales, but that may offend some of the more sensitive natured visitors. So instead, why not take a look at what was in it for yourself?

Introducing 50 Quick, 2 Minute Shortcuts To Online Business Success - It's good to dream - Most if not all marketers day-dream or even dream about their perfect business. When an income like this is going to change your whole life, and give you the feeling of self worth, achievement and the sense of fulfillment that it does, you want it bad, its only natural to think about it and imagine it. There's one instance when this will destroy your business prospects. Most have been doing it for years without even noticing. Avoid it at all costs, and prosper. - Learn the secrets of quick-fast business progress. How do big names create and launch ten products, when it takes most others the same amount of time to release just one? It's easy when you know how, and I'm going to show you how I do this to tune of \$100,000 profit months. (Hint: It's nothing to do with throwing masses of your hard earned cash at a product and hoping for the best, there's more to it than that). - Why you have an advantage over all other marketers sitting where you are now, thinking what you're thinking now. Most marketers are down on their luck and confidence. There's one thing they don't know about themselves though that makes them special and gifted compared to 99 of the worlds population. Your confidence will improve massively when I show you what you have. - The art of learning a new skill in mere hours. Go to school, go to college, go into job training, and you're sat in front of learning material for years. So how is it I can pick up almost any niche, or business technique, adapt it to my business and make a big bundle of cash in just days, before anyone else even knows it exists? It's easy when you know how, and I'll demonstrate this exact process. - Learn four new methods to ensure fast results throughout all aspects of your online business. Let me ask you, when a friend of yours comes home from their full time job, what have they achieved? Probably paid a little bit of the rent and made someone else very rich. When most marketers start out on their business, that's exactly what they end up doing too, through no fault of their own, but out of habit. I'm going to show you how to kick that habit with a view to increasing your ability to make progress and see rules up to ten times faster than you currently do. (one months work in about three days, easy when you know how) - It's not what you know, it's who

you know. Ever heard that saying? It's the same in online marketing. How do you hook up with the big earners when they already have hundreds of other marketers queuing at their doorstep, trying to get ads to their lists and more? I'll show you how, and it might surprise you to find out you don't even have to have a list. You could be broke, struggling to pay the rent and still pull this off. - 3 ways to be lazy and succeed. Who doesn't want to sit back and have everything done for them? While your marketing friend is sitting up at their computer for 16 hours a day, seven days a week, promising their wife and husband it'll pay off soon over and over, I'm sitting here relaxing, working under 20 hours per week on average and still making ten, twenty, even a hundred times what they do. I'm going to show you to be lazy and prosper (music to my ears that). And that's just the first section - While most marketers come up with an idea, sell it and make a couple of thousand dollars, each idea is worth at least a hundred times that to me. I'll show you exactly how I extract so much money out of every single idea I launch, and you'll immediately see how easy this is for you to replicate (note: in the short term, without this, my profits would be over eleven times smaller than what they are, that's how much of a difference it makes. - Those of you who know me, also know that I run my business in a very specific way that allows me to extract masses of money from my target market, incredibly quickly, and whenever I please. So I feel like a new car, fair enough. I'll make enough to buy one in the morning. How about a make-over for the house? Sure, give me a moment to **** * and its mine. It's as easy as that. - Did you know that the majority of online marketers I see struggling aren't actually doing much wrong. In fact, all they've done is got their products a little bit mixed up. One small fix that takes less than 24 hours, and they could go from broke, to seeing my average pay. The problem is, they don't even notice that's the case - This could be you, right now... Shame really, there could be a lot more rich people out there if they knew this little tip. (Note: This one alone is worth the entire price of the package. I don't reveal it to anyone unless they're paying, usually a heck of a lot more than what this package costs. - Learn to joint venture effectively in just 20 minutes, even if you've never joint ventured before, or don't have anything to offer. The more people that know about this the better if you ask me. That means more people to joint venture with, and more money for us to make (while those who don't know close this page and spend another three years struggling to find out on their own - to those people I say: think about your pockets! Give them a break, and save yourself the time while you're at it) I'll give you everything you need to start gathering joint ventures, today! - 3 methods I use to build my list by hundreds of subscribers every single day. Just think, if you used these

methods for three months at just 100 subscribers per day, how many subs would you have? - Enough to make a good \$2000 per mailing if you handle them correctly. (We teach you that too, handy eh?) - Why on earth are you selling e-books at \$50? I'd never dream of selling \$50 products. You know why? Cause I wanna be rich. That doesn't mean ripping people off of course. Your product has to have certain elements (and so does your sales letter) to get your potential customers to just hand you over \$200-2000 per product. If you don't have these, no one will buy. If you do have them, well, I'll let you figure out how much cash you'd have if you sold a product per day at that price... - In fact, a product a day is pretty meager, so lets forget about that - My last website sold 150 of such products in the first 24 hour launch period, and in all honesty, it ain't that hard to learn how to do that. I'll show you exactly how I get those results regularly, and keep them coming, even after the initial burst during the launch period. It's no harder to do than what you're doing now, all it takes is a big change of direction. - What does my market want? And how can I give it to them? - Two of the most important questions you can ask yourself. The answers are easy to figure out, and you know what happens when you give your market what they want right? They pay you for it. In fact, they scramble to pay you for it. Learn the insider knowledge that allows the big earners to do this, while leaving newbies out in the dark. (Unfair I know, but that's how this business works) - Learn to build your own business while promoting affiliate programs to make extra cash. It's often thought that it's impossible to effectively promote affiliate programs and build your own business at the same time. It's one or the other. That's not right. In fact, my business would be four years behind what it is now if I hadn't applied these four, 2 minute quick fixes.
