Auto RSS "Manipulate The Search Engines With An Easy To Setup And Configure RSS Script" Let's say you were selling a bonsai gardening product again. Your ad text could look like this: {Keyword:Bonsai} Secrets! This is the {Keyword:Bonsai} Website that everyone is talking about!

yourwebsite.com/{Keyword:Bonsai} Destination URL: yourwebsite.com/{Keyword:Bonsai}.html Google Adwords will replace any instance of {Keyword:Bonsai} with the keyword the searcher typed into Google. If the keyword is too long to fit into the adtext, it will replace it with just the word "Bonsai". What most people do not know, is this ALSO works in the destination URL! So you can have a destination URL like this: Destination URL: yourwebsite.com/{Keyword:Bonsai}.html So if the person was searching for "Bonsai Gardneing" on google, and you were using the Destination URL shown above, they would go here when they clicked on your add: yourwebsite.com/Bonsai Gardening.html Pretty cool, right? This product comes with private label rights. Tags: rss, php
