Color Photo Synergizer Tired of those same old color themes? Try using colors from images to design your websites! This Isn't Anything You've Ever Been Exposed To Before. You're About To Be Handed The Key That Unlocks And Makes It Possible To Extract Colors Schemes From Images... Designing a successful website means spending hundreds of man-hours in determining the perfect color combination and visual appeal. A successful design is the product of an effective interaction of various design elements -fonts, animation, graphics and pictures together with colors and its varying gradients barely perceptible to the human eye. Dear Friend, You have come across websites whose overall synthesis of color and design are highly appealing, pleasing and greatly effective. The overall effect is a subtle and positive assault on the visual and auditory senses including the emotions producing a genuinely encouraging and upbeat attitude to the viewer. The result? A vote of confidence and definitely a potential new client of your website, product or service. Moreover, a highly satisfied viewer who will undoubtedly refer your website to friends and colleagues who may have a requirement for your particular product or service. A very simple yet effective viral marketing strategy! Designs like these are not accidental but the product of graphics and design professionals who spent years in studying and learning their craft and how to effectively utilize the different elements of color and make it an effective marketing tool. Scientific studies done by the Institute for Color Research reveal that, "human beings make a subconscious judgment within 90 seconds of initial viewing, and that between 62 and 90 of that assessment is based on color alone." Imagine the leverage you will have if you are able to extract the exact, same colors from these successful graphic design elements and use them for your advantage! Not only do you save the in the cost of hiring professional designers but you already have a tested and proven color scheme in less

time! It's Quick, Easy And Step-By-Step Color Photo Synergizer can effectively extract any single color from any photo or image, which you can use it for your websites and graphic projects.
