"Get Your Ads Noticed With These Non-Intrusive Cool New Corner Peel Effects." Dear Friend, have you ever seen those cool little "corner peel" effects that expand when you put your mouse over them? Ever wondered how to set one of those up on your own site? These corner peel ads are a very effective way to bring attention to certain special offers or pages on your websites that you want your visitors to see. They're sort of like pop-ups, but less intrusive and less annoying. Although pop-ups do work great, and I use them myself, I'm sure you can agree that they CAN get quite a bit annoying at times. There is a place and time to use pop-ups, and then for some other type of offers, it's better to mix things up and use something different - like corner peel ads. These corner peels ads just sit there in the corner, and just beg to be "peeled off". And it's up to the website visitor if they want to see the ad or not (it doesn't automatically pop up in their face). Easy Corner Peel Ads is a product I created to make it super easy for you to add one of these cool corner peels to your own website. There are other products out there for these corner peel effects, so what makes this one special? What makes "Easy Corner Peel Ads" unique are the premium quality templates that come with the package. When using these corner peel ads, you want to make sure that people actually want to click them and that they look nice. And most other corner peel scripts come with cheesy looking templates or without any templates at all. With THIS package you get... 24 Premium Quality Corner Peel Templates (with full PSD source files) Ready-To-Go Small Corner Templates with 7 different phrases and 5 different colors The corner peel script Simple

step-by-step instructions Original sales page in english and german. Images and a Master Resale Rights License. Privacy Policy-, Earnings Disclaimer-, Terms and Conditions Page.
