You have the privilege of forging a very special link with a burgeoning talent , and you're in there at the beginning. This is just the way you'll feel about John's music... So why is it called the Other Side of the Knife? Singer songwriter John Cullimore, has been nicknamed the 'Singing Surgeon', following the publicity surrounding his musical activities but John's musical roots were firmly established as a boy growing up in Liverpool in the midst of the Merseybeat euphoria of the 60's. Music took a back seat to Medicine as he trained to become a surgeon in London. Despite this , the musical flames never extinguished ,as John amassed a wealth of original material which has finally been recorded. So this disk really represents the other side of his life. See johncullimore (gig details) or railwaytown.com/ John would like to thank all those CD baby patrons who have bought the disk , including all the 'new' Cullimore's who've become acquainted as a result of his music.
