Dear Friend, Do you know that when you're starting out on an Internet business, you will come across A LOT of new challenges that are RARELY being told by most people? Step-by-step guides are a good way to start and that really cut down on your learning curves. However, Most marketing manuals teach you WHAT to do instead of showing you How To Do I have heard the same questions over and over again from many newbies on how to setup their online business. Things like... \* How do I register a domain name? \* What the heck is DNS and how do I change them? \* How do I register a web hosting account and get my site set up? \* How do I install popups on my website? \* How can I let customers automatically download my product? \* How do I set up an autoresponder? \* How do I process my orders? \* How do I setup my order links? \* How can I upload files to my webpage? You simply cannot setup a business on the Internet without knowing these and other basics steps. So, I decided that I was going to put together a series of online videos to help newbies cut their learning curve drastically and eventually get their own Internet business up and running a whole lot faster and easier. After \*literally\* months of hard work, I finally manage to create a series of video tutorials successfully: But dont take my word for it, heres what

The videos start with an introduction on domain names, and from then on the information keeps right on coming. From uploading, downloading, and creating a basic website, these videos bring you an almost non-stop avalanche of marketing know-how. Need to know how to install pop-ups? You'll find get it all down right here. Thinking about using Clickbank? Look no further, from registering to sales pages to testing an order, you'll soon know what you need to know most about Clickbank. Plus even more about other payment processors, like PayPal and Paysystems, and how to link them to your sales letter. In the 5 minute video, How To Redirect Your Webpages, they quickly and easily cover two different approaches. How to redirect from your cpanel, and in the event you don't have that feature, they show you the exact html code to redirect your web pages and eliminate error messages and pages not found. If you are looking to fast track your knowledge of marketing on the web, these 30 videos will get you up to speed in short order. There's no fill and no fluff, just good down-to-earth information that will get you on the road to success. George Sepich createandsellproducts.com Now think about it. If you're not watching these videos, it may take you many months before you can finally set up your Internet business. (Of course, depending on your present level of skills and knowledge) What I've seen in general is that most newbies have no idea on how to do these technical stuff. I've seen a lot of similar help requests on many marketing forums, every single day. Even with the help of those guys, they can only tell you how to do it on writing but you've still got to figure out how to do what you've been told! Why spend the next weeks and months trying to figure out all of the steps it takes to get things going online -- when you can watch someone show you exactly how to take action and get your business up and running today? With these videos, you'll be able to watch them directly from the computer screen itself! III Top Up Your Fool-Proof Passport To Success With My Unconditional 100 Iron Clad Money-Back Guarantee! Studying All The Courses And Tutorials I'd Recently Bought These videos are exactly what I've been looking for. I've already wasted a great deal of money on lots of ebooks, membership sites and outdated video tutorials. Everyone talks about how easy it is, but if you haven't done it before it's like trying to walk up a steep mountain in flip-flops... This is where I found the

Internet Marketing Basics Videos to be so helpful. The lessons were very easy to follow and to understand, and thankfully you don't make any assumptions as to what a beginner should already know. You cover everything that a beginner will need to know and much more besides. Other courses I've tried simply don't go into as much detail and at the end you are still left wondering how do I do this. In fact, I learned more in one day watching your videos than studying all the courses and tutorials I'd recently bought. By the way, next week I'll be starting your more advanced Install CGI Scripts video course. I didn't realize it was so important to know all of this, but then I haven't seen anything quite like this anywhere on the net. This is really good stuff... If only I had found your website sooner! Thanks for a great course.
