A continuous track that explore your mind into a world of trance and ambient. 14 MP3 Songs
ELECTRONIC: Progressive Trance, ELECTRONIC: Electronica Details: CloudIX's first time attempt on creating a continuous track separating into different parts known as his Discovery Series. Entirely instrumental and over an hour long when listened to altogether. No vocals from Laura Thaxton is in this album. She is currently still working on vocals for Guilty Conscience: ReMiXeS as well as the new upcoming release album currently untitled. The entire mood of this track is a combination of being in a club environment as well as being outside under the dark sky with the moon while laying on the grass and yet still filled with chaos. Confusing, eh? Well it can only be fully analyzed when listened. Each track has its own feel and emotion, while keeping the same overall meaning and it's tempo. An album just filled with a new experience everytime. Just simply close your eyes and picture yourself in a new place and let the music take control.
