A minimalist synthpop band with strong ties to the 80's stylings of the genre, focusing on poppy hooks and catchy songs. 10 MP3 Songs ELECTRONIC: Pop Crossover, POP: with Electronic Production
Details: Cosmicity is the most prolific artist on the synthpop scene, releasing an average of more than one album per year. Those albums keep getting better and better, as "The Binary Language of Love" proves, appealing to not only modern electronic music fans, but also to fans of classic acts like Erasure, OMD, Pet Shop Boys, or New Order. One fan wrote: I am not going to say this album "sounds like" Pet Shop Boys and OMD, but I am going to say THAT if you like PSB and OMD I bet you WILL enjoy this album very much. The singer's voice is very similar to OMD. This is light synth pop, yet very elaborate. The melodies, the sounds, the voices are very nice. I am quite picky in music and I HATE songs without melodies and this album has a lot of good melodies.
