This cd is music for meditation with a written guide. It is an offer to get acquainted with how one technique of meditation can be and hopefully it can give inspiration to continue meditating adapted to your own needs. 7 MP3 Songs NEW AGE: Meditation, NEW AGE: Healing Details: Metatone is located in Aalborg where amongst other things music for meditation, based on many years of experience with both music and meditation are produced. When Metatone composes music for meditation it is of great importance that the cosmic laws create the foundation. The musical structure is simple and founded on the harmony of the spheres and the notes of the individual planets combined with the chakras in the body where the mental energies and functions evolve around its own note in an intimate relation to the cosmic powers. Overall the music is built on the golden disposition as we know it from the golden section in both architecture as well as art. When the rhythm of the music respects nature's own rhythm, harmony rises and by maintaining the cosmic laws the experience of the music intensifies. Rolf Bekker metatone.dk
