Blues, rock, world...great tunes. Densely rhythmic yet sonically sparse multi-tracked guitars. 11 MP3 Songs ROCK: Americana, BLUES: Acoustic Blues Details: "...Get this man into a studio. I'm talking about somewhere major, like maybe E-Squared, Steve Earle's label. Or how bout that new one that Lucinda is on - Lost Highway? Here's an artist who is definitely worth the major investment required to bring someone to national prominence. And I don't say that lightly. This man has been around the block a time or two and it's very evident in his performance skills and songwriting talent. This piece of americana country blues is highly reminiscent of Ray Wylie Hubbard, who up to his most recent recording had been getting a bit long in the tooth, musically speaking. I've long been searching for someone who fits Hubbard's quirkiness and layers on the sensibilities of someone like Jimmie Dale Gilmore. Add in a Chris Knight kind of toughness and you have Steve Knechtges..." Chris K. godsofmusic.com The songs on this cd were recorded in 2001/2002.
