Country/Americana 15 MP3 Songs COUNTRY: Modern Country, COUNTRY: Country Rock Details: ABOUT THE BAND. . . It all started the day Jim Hill and Dave Branch walked into Gerry Putnam's CedarHouse Sound Mastering in North Sutton, N.H., with a tribute song about the late, great Dale Earnhardt called "Raise Your Hands". The minute Jim and Dave started playing, Gerry knew that there was something different here. When the song hit 58 on country's top 100, everyone who heard it knew they had something really good here. The LongHauler's are about simple, heartfelt songs and some of the best players New England has to offer. Gerry Putnam's guitar and producing skills make The LongHauler's sound as unique as the part of the country they're from. Gordon Stone on pedal steel, Scott Elliot on bass, Caleb Bronz on drums, Dave Branch and Charlie Carpenter on keyboards and strings. These guys rank among the "who's who" of New England musicians. Add Jim Hill's song writing and vocal style and you've got The LongHaulers, a seasoned group of veterans with a distinctive New England country sound. So get ready to get behind the wheel of The LongHaulers debut CD, "Endless Road". We think you'll agree, these ol' boys have that big rig headed down the right road!
