

Track Of The Moon Beast

Mineralogist Paul Carlson (Chase Cordell) is struck by a lunar meteorite while observing a meteor shower. Lodged in his brain, the meteorite causes him to transform into a strong and vicious lizard (the titular "moon beast") whenever the moon comes out. In his lizard form, Paul loses all traces of his human self and goes about killing people at random. While human, Paul is subject to spells of dizziness and nausea, causing his girlfriend Kathy Nolan (Donna Leigh Drake) and friend and former teacher Johnny Longbow (Gregorio Sala) to become concerned. Eventually it is deduced that Paul is the monster, and that the meteorite fragment in his brain is the cause of his transformations. Plans are made to remove it from his skull, but Johnny realizes, after remembering some Native American legends documenting similar phenomena, that the meteorite has disintegrated and will eventually cause Paul to self-combust. When Paul learns of this, he escapes into the desert, presumably to kill himself so he will not cause any more harm. Kathy, Johnny, and the local law enforcement follow him, and Johnny shoots him with an arrow made of the original meteorite, which causes him to explode.
