Wedding cake decorating Excerpt: "Every cake worth merit starts with a smooth icing. The cake needs to cool completely before they are iced and decorated. To keep crumbs from ending up in your icing and ruining the look of your cake, start with a thin base coat of frosting that is not quite as stiff as the regular layer will be. Once this coat is on, set the cake in the refrigerator for 20 minutes. This will set the icing and any crumbs will be caught in this first layer. Now you can spread a regular layer of icing without worrying about crumbs." PLR rights: [YES] Can put your name as the author. [YES] Can edit the contents. [YES] Can be broken down into articles.
