The work on this album was greatly inspired by our strong relationship with our fans, and the music of a many great recording artists. In India Aries song, Slow Down, she offers us the message that you shouldnt rush certain things. Everything needs to be given its own time in order to become what it will be; including each of us. This message was kept in mind throughout the production of this album. Different, was written out of a need to uplift people that, because of their differences, suffer the pain of being treated badly by people that are cruel, inconsiderate, or simply havent been taught any better. Hopefully, this song will help these people to realize how wonderful and unique they are and to focus on, and be proud of, the greatness they have within them. Keep your head up. Close To Me is a fun, catchy, loveable song that was recorded at Little City last year by a good friend, Drew Gorman. I immediately fell in love with it and included it in this album. It was a LOT of fun. Nadir brings his own magic to What A Wonderful World with his wide vocal range in a heartfelt rendition of this song. His son, Bryce Miles Powell, crying in the background, made this recording that much more special for all of us. Thanks Bryce! B. David shared his unique voice and spirit with us on Just The Two Of Us. He said that he has had a love affair with that song for many years, and that love, and his brilliance shine through vividly in his performance! Mark Aaron was the perfect match for Change The World. He came in with his usual positive mood, and laid down such a vibe, it gave me goose bumps! The fire and seduction in Tony Zekes voice was perfect for Every Breath You Take. He stepped in, with his captivating style, and made yet another classic song his very own! Yes, this album is
