

Mp3 Atmozpheryc - Electronic Oxygen

[DOWNLOAD HERE](#)

A unique, fresh form of electronica merged with various styles of rock, ambient and experimental flavors. 14 MP3 Songs

ELECTRONIC: Down Tempo, ELECTRONIC: Ambient Details: I am a recent graduate with a telecommunications degree with a focus on sound design. I have little musical background but have always loved creating my own tunes. I only use Reason 2.5 and my Edirol PCR-M30 on my old Apple computer which is slow yet gets the job mostly done. I just plan on creating what I think is cool and if it is accepted in the music world... then more power to music :) A huge influence in my music has always been and always will be game music. From the winner of Rolling Stones Magazine most original soundtrack of the year "Halo" to the oldskool Megaman background beats! It might sound wierd...but if you really listen to some of this stuff...it's just amazing...and the remixing community behind the stuff is really cool! I hope you can enjoy my music creations as much, if not more, than I do creating them!
