Designed for listening, it was recorded live in the studio on all analog equipment, and will carry the listener on a musical journey around the world. The compositions were created through a process of meditation that led to deep intimacy with the music. This fills the listener with a sense that each note is where it should be - both on the surface and far below. Whether as background music, or under intense scrutiny by an avid listener, Blues for the Bear can be played again and again, each time revealing something new. "Surprising.... The compositions show a maturity that is rare among young jazz composers." --New Jazz Review Jesse Stern is a composer, producer, musician and healer living in Los Angeles, CA.
