

Mp3 Matt Burmeister - Alligator Adventure

[DOWNLOAD HERE](#)

This music was created to perfectly compliment Alligator Adventure and its animals. Having a wild, jungle-like atmosphere that inhabits hundreds of different species; this music is its direct reflection. 11 MP3 Songs WORLD: World Fusion, ELECTRONIC: Drum 'n Bass/Jungle Details: After the success of "The Jungle's Playful Symphony" I was asked to do another similar drum CD for Alligator Adventure - the reptile capital of the world. This music seems to have taken a bit more of a mellow, almost darker feel compared to "The Jungle's Playful Symphony." The people at Alligator Adventure wanted music that would compliment the enormous variety of animals that are a part of their facility all the while providing visitors with an uplifting sonic landscape....so that's what I gave them! As with my other projects, this one was recorded in my home studio. Finishing touches and mastering were done with producer/engineer extraordinaire Mark Rubel at Pogo Studios in Champaign Illinois. This is all I need to say right now, download a few clips and check it out for yourself. After that check out my other releases here too!!!! ***A few of the tracks from this CD are featured on a show called "The Croc Doc". It's a program about the life and work of world renowned animal expert Dr. Sam Seashole. The program has been aired on a PBS affiliate station and their documentary style DVD has just been released."*** Thanks Matt
