

Mp3 Rogers Shih - Piano Soundscape

[DOWNLOAD HERE](#)

Passionate piano pieces, across the classical style to the new age tunes. Tender but emotional melody with peaceful tranquility. 11 MP3 Songs EASY LISTENING: Mood Music, CLASSICAL: New Age Details: Rogers is a professional pianist who earns a living by performing in some hotel or restaurants. In addition to piano, he also familiar with production techniques (e.g.: digital recording, MIDI, Sampling...etc). However, he loves musing on creative musical production better than paying too much attention on imitating others. With the reputation of "king of musical instruments", he concentrated in composing piano music when he was very young. Moreover, piano also provided a great variety of combinations/opportunities in musical composition. That's why he tried to produce the album: "Piano Soundscape". In this album, some of pieces were recorded when he was a college student, some of others were produced recently when he was a studio engineer. In his collection of past musical works, only these piano music pieces reflected his belief in musical composition. Thus, he refurbished these pieces with new arrangements and a new CD cover-design and imaging by the sun, sky and white cloud shining on the dried-up land, describing a lonely soul escaped from a habitually sorrowful, turning to a mature and splendid life. The best one which reflects this maturity achievement is "The Hill of Lavender". In this work, he captured natural pulsation in his mind imaging the great landscape of lavender. Just like "Paradise", "Joyful Tears" in this album, those works were found by his attempt to walk out the dark side in his life. When he pays more attention to beautiful stories, he experienced less time concentrating in misfortune. Let these beautiful pieces enlighten your life. Let's enjoy the beautiful movement in "The Ocean of Stars". Let's go out bathing in gentle breeze with this beautiful album. (PS: This album was delivered to some digital distribution company like iTunes, MusicNet..etc. You may purchase single tracks via those services)
